kokou-espoir-ativon espoir-ativon.vercel.app github.com/espoupou

Profile

Final-year EILCO engineering student specialising in Industry 4.0, combining industrial performance and digital technologies. Field experience in standardisation, continuous improvement, process analysis and quality systems. Practical use of Lean Six Sigma, data analysis and industrial digitalisation tools. Able to connect operator needs, performance indicators and technical solutions in production environments.

Education

Engineering degree in Industrial Engineering **Sep. 2025 – Jun. 2027**
EILCO – Engineering School of the Littoral Côte d'Opale *France*
Advanced robotics, digital factory, automation and supervision, computer vision, ERP and MES, industrial AI and data, maintenance and safety, supply chain, operations research and collaborative mechanical design.

Engineering degree in Industrial Engineering and Digital Technologies **Sep. 2023 – Jun. 2027**
ENSAM Rabat *Morocco*

DEUG in Mathematics and Computer Science **Aug. 2021 – Jun. 2023**
Abdelmalek Essaâdi University – Faculty of Sciences in Tétouan *Morocco*

Professional Programme in Software Engineering **Mar. 2023 – Jun. 2024**
ALX Academy

Professional experience

Industrial Performance and Standardisation Intern **15 Jun. – 11 Sep. 2026**
Kerry Savoury Ingredients France *Blendecques, France*

- Conducted workstation observations with shop-floor teams, performed time studies and analysed losses, changeovers and cleaning activities.
- Supported process standardisation using WES, SWOP, Gemba, SMED, VSM, 3C and Layered Confirmation approaches.
- Created and improved work standards and control materials for operational monitoring and the long-term adoption of good practices.
- Monitored performance indicators and considered hygiene, safety, CCP and CP requirements, with exposure to SAP, MES and logistics flows.

Process Analysis and Improvement Intern **Jul. – Aug. 2024**
Super Cérame *Tétouan, Morocco*

- Studied how slip density, viscosity and residue before atomisation affected process stability.
- Collected, structured, cleaned and analysed production data with Excel and Python to identify operating trends and deviations.
- Translated analysis results into rules and reference points that operators could apply directly.
- Used EVOCON and Xperlean to review production monitoring data and performance indicators, including OEE.

Internal Quality Assurance Intern **Jul. – Aug. 2025**
Mohammed V University, Internal Quality Assurance Office *Rabat, Morocco*

- Contributed to an ISO 21001-based approach through process mapping, stakeholder analysis and document organisation.
- Supported the definition and monitoring of indicators used to manage the internal quality assurance system.
- Identified gaps and proposed improvement actions in collaboration with several university functions.

Web Developer, earlier experience **2020 – 2021**
SafNet Togo and Ghiyada Africa *Lomé, Togo*

- Developed a Django family-finance application with authentication, dashboards and dynamic forms.
- Built websites, landing pages and client-facing features spanning interface integration and data management.
- Strengthened foundations in web architecture, front-end and back-end development, databases and script automation.

Industrial projects

Assembly line design and optimisation – VSM, DMAIC, MODAPTS, time studies, workstation balancing, ARENA simulation, Axelor ERP, ESP32, Node-RED, MySQL, OEE and Power BI.
Huffman image compression and decompression – Pixel-matrix processing and experimentation in Google Colab.
Automation and digital factory – Academic work involving PLCs, Grafcet, Ladder, PID, smart sensors, industrial networks, supervision, mobile robotics and computer vision.

Skills

Industrial performance and Lean: Lean Six Sigma, DMAIC, Kaizen, 5S, Gemba, SMED, VSM, 3C, WES, SWOP, LPA, 5 Why, Ishikawa, A3, PDCA, SIPOC, MODAPTS, line balancing, takt time, OEE, KPIs
Quality, safety and processes: ISO 9001, ISO 14001, ISO 45001, ISO 21001, CCP, CP, process mapping, stakeholder analysis, document management, root-cause analysis, continuous improvement
Production, supply chain and maintenance: Production management, supply chain, operations research, transport and optimisation problems, logistics and WMS, industrial maintenance and safety, studied through coursework and applied projects
Data and decision support: Advanced Excel, Power BI, Python, SQL, MySQL, data cleaning and analysis, industrial regression and classification coursework, Google Sheets, scripting, basic VBA
Industrial systems and simulation: SAP and MES, initial experience, Axelor ERP, EVOCON, Xperlean, ARENA, Node-RED, ESP32, MQTT, supervision and data acquisition
Automation and robotics: Grafcet, Ladder, PID, smart sensors, industrial networks, mobile robotics, uncertainty management and computer vision, academic knowledge
Mechanical design: CATIA V5, collaborative design, basic SolidWorks
Software development: Django, JavaScript, Python, PHP, Bootstrap, front-end and back-end development, SQL and NoSQL databases, software architecture, automation, web scraping, basic Flutter

Certification

Lean Six Sigma Black Belt, AIGPE, 2026

Languages

French, native **English**, professional working proficiency, TOEIC 855/990
